The background of the cover is a light blue gradient. It features abstract graphic elements: a series of white, curved, wavy lines that sweep across the lower half of the page, and a fan-like pattern of many thin, white, parallel lines that originate from the bottom center and spread out towards the left side. The overall aesthetic is modern and minimalist.

- The country / nations are peopled are Beasts - although they call themselves humans.
- Those who considered others to be humans - are real humans.
- Those who do not consider others to be humans like themselves - are Beasts although they call themselves humans.

PARADISE

Paradise
To reach Paradise
One is to walk on a very thin line
Not possible for me
Beyond my reach
I prefer not to live in Paradise
I determine my own fate
Whether it is anything else or hell
If I don't harm any other human
Through my acts and deeds
If I do justice to others
If I care for others
If I help others
If I respect others
If I perform my duties well
Nothing against the humanity
I make my fate myself
He has empowered me with all the senses
Conveyed me the difference of GOOD and Evil
It is me to decide to live with GOOD or BAD
It is me to decide my fate
Paradise or Hell in this world
When I am satisfied and happy with my GOOD
It is Paradise here and above
He has appointed me as His Viceroy in this world
Viceroy is next to Him.
It is me to decide my fate in this world and above
When I appear before Him
He will say you have done well in the world
When you decided to do good in the world
It is me to decide my fate in this world.

Tied with trees
Some in dangles
Make pooh pooh noise with full throat
Some sing like flock of birds
Bunch of blossomed flowers,
All happy, when together
Innocent smile fill the hearts with love and joy
Learn truth, good, virtue,
Spread love amongst them
In childhood some watch separation,
Splitting parents
Unaware of crooked crunchy
Lusty, greedy selfish world of elders
They have to step in shoes of elders
Who act'n follow lies leaving Truth aside,
Filled with prejudice, hatred and arrogance,
Elders to show
Love, respect, positivity for each others irrespectively
To transfer onwards to generations
Children follow elders

Gender Dominance

Human kind has two main genders
Male, Female
Third "Transgender"
In process of recognition
Some times back in history
Male felt physically strong
Dominated the Female
Since then became symbol of violence
Cross limits
Kill innocents
Responsible for massacres, genocides, holocaust,

Sufferings, deprivations
Though over powering, usurping, capturing resource
Exploit religion, faith and other pretexts
Spreading prejudice, hatred

Or shall prove other wise
Ensuring safety, security, peace and prosperity
Of all on parity, regardless

Women in Command

Since centuries
Men remained in dominance
But have failed miserably
In providing food, justice, health care,

The well being of human kind
Hidden in co sharing with women

Men not to feel low or awkward
Let the women come forward in all fields
Let the women be given a chance
Let the women be in command
For the good of us all
Or men to continue creating disparities and ki
Wait for the destruction
Not few but all will go
WISDOM lurking in doldrums

We Love You Mother Earth

A VIEW ON FAITH AND FAITHFULNESS

When a child is born on this planet it has no option to select between a rich or poor family. If that option is available it would certainly opt for a rich family and not go for poor surroundings where even clean drinking water is not available.

Faith is a personal affair of a person. It mainly relates to the parenthood of child. When a child is born it follows the faith as of its parents. It can be called as a compulsion of birth. Thus, he becomes a follower of "Buddhism, Hinduism, Judaism, Christianity, Islam, Zoroastrianism, Sikhism Baha'i faith. Certain numbers of humans do change their faith but their number is insignificant when compare to population of the world 6,57,000,000 (approximately).

All religions or faiths of the world preach truth, Justice, respect, love, peace fairness kindness Empathy, Compassion, Equality and tolerance. It is the nature of human to follow those who preach or teach the positive way of life as professed and conveyed by Prophets Saints Gurus, Pundits, Bishops, Leaders.

Social surroundings serve as the first educational institution for a child. When he attains the age 4-6, parents send him to proper educational institution if available and affordable. After completing his education he enters in practical world. Then he experiences the realities and complexities of life. It is revealed on him that there are many other forces about which he has never been told and taught, such as fraud, dishonestly, treachery, plundering etc. He also experiences difference in the performance of rituals in

different religion as well as among sects of same religion which breed disharmony between religions and within the same religion. He comes across another fact that people live in different countries separated by border lines. To maintain these lines trillions of dollars are spent annually as military expenditures. Where as only a fraction of this colossal amount can be better utilized for providing basic amenities of life for more than 50% of the human race deprived of such basic needs.

It is suggested that there should be a sharing of knowledge and resources of the world amongst the humans of the world. Safety of this world lies in co-existence, Co-respect, non-exploitation of follower of all faiths, without fear and interference.

Humans of different faiths have been living on this earth and will continue to live unless it is destroyed by humans themselves or by the Supreme Power of the Universe.

If human being wants respect for himself he will have to respect other

All religions preach "Good": The good cannot fight with good if so, something is wrong somewhere.

Loss of a Human Kind is Humanity's Loss

- Every minute a human being is killed by gun.
- Half a million humans are killed each year.
- 90% civilian casualties are caused by small arm.
- There are approximately 300,000 child soldiers in the world
- There are 639 millions fire arms in the world, 59% are legally held by civilians.

Trillions Spend on Arms and Weapons

- Every year approximately 1.7 trillions dollars are being spent on military expenditure (Arms, Weapons)
- Arms worth billions of dollars turn into scrap every year.
- Restriction on production and trade of arms will save billions of dollars which can be spent on providing education health care, agriculture research, creating jobs, pure water supply, sanitation and other facilities of life to human beings.
- Arms should only be in possession of Law Enforcing Agencies.
- In the circles, any manufactured product requires marketing field for its consumption. Marketing of Arms needs a "Conflict Zone of Enmity" between groups of people in a country, countries on different issues, Race, Faith, Ethnicity, Resources and Borders.
- It is presumed that these CZE are created deliberately through local agents belonging to

different sections / departments of an area or country, countries specifically in less educated and under developed nations. By use of arms, generally innocent human kinds are killed.

- Permanent UN Security Council Members USA, UK, France, Russia and China dominate the world trade in arms.
- A human mind is failed to understand what kind of trade it is, that citizens of Arms exporting countries are benefited which involve blood of Innocents or other countries.

Development Dilemma of under developed Nations

The story of the physical evolution of Humankind could be millions of years old. However, Man's social evolution is not that distant. In fact the humankind is on continuous journey. Seeking and redefining society. The Hallmark of this process of redefining Civilization is Man's continuous quest to live in a society of Truth, Love, Respect, Justice, Empathy, Compassion, Tolerance, Forbearance, Education, Honesty and Equality. The purpose was to maintain discipline and peaceful order in the society for the welfare, well being, safety, security and happiness of its members.

The Human selected his abode which was rich in natural resources, water, food and the like. In case of famine or increase in population, Man had to look for other areas which resulted in fights and wars between migrant and already settled people in that area. With the passage of time system of government evolved from tribal system to a country system. Necessity turned in to greed to fetch more areas. History is full of wars based on Human greed.

The invention of printing machine in Germany changed the scenario of human knowledge. New windows of knowledge were opened resulting in many inventions in various fields of life. There evolved new concepts of arms and weapons. Guns, tanks, trucks replaced the swords, arrows and horses. Europe became centre of modern education on the planet.

Some countries from Europe first started trading and then conquering other countries in different regions of the world. The newly annexed regions became

colonies of the conquering Nations who embarked upon a process of resource transfers for the benefit of their own citizens. The newly Colonial powers introduced new Administrative structures which were solely which were largely for ruling the subjects and also introduced infra structure like Railways, Healthcare system, justice system and educational institutions,. Exploitation of resources was the Prime object. The children of the colonies were forced to study foreign languages for the purpose of jobs in different departments of the Governments. The under developed nations have the same old inferior standard of education system. In presence of this the students of these countries have to look for higher education towards the countries with higher standard education system of developed world, which kept mental growth of people of these countries at a very low level.

In the colonies, rule was perpetuated through existing elite. A new class of bureaucracy was set also in place with powers to control the masses. Their job was to serve the Masters maintaining the distance between the subjects and the rulers. After the II-world war, the Colonial powers became weak and had to grant independence to the colonies. The so called independent Nations ran the same old Administrative system. Bureaucracy and Army of new nations took the role of Masters replacing the old. They preferred to continue running the country in previous manner. Except few, rest all had to rely on aids and loans from previous masters to run the business of Governments. This reliance, later on proved to be a Trap as countries went into another kind of enslavement which is called Debt Enslavement. The Financial institutions and the aid giving countries, agencies laid conditions and restriction in such a way that the loan receiving country gradually became an independent nation.

Only one or two countries have successfully continued to apply Democratic political system for running the country. All others had gone through periodic phase of dictatorship or continuation of kingdom system which hampered the path of evolutionary thinking of human mind. In general the affairs of these countries were interfered by the powerful countries as reflected in the declassified documents. In absence of accountability norms, rampant corruption in all fields of the social system of developing world is visibly manifest.

The corrupt political and non-political leadership of under developed nations have deposited huge sums of plundered money in foreign banks. There is no strict control and check over money laundering which is financial crime. Only a few agencies have been created. They too seem to have failed to perform effective role in their functions. May be lack of support from U.N.O.

Approximately, 7 trillion Dollars/Euros of per capita countries are lying abroad whereas their citizens face sufferings deprivation, misery of various kinds. They also pay back loans with interest for the money which was never used for their welfare.

The banker in a foreign bank offers dinner to a thief from an under developed country for opening an account and fulfilling the formalities at his own. Whereas a student has to prove the legitimacy and fulfill many requirements for only a few thousands. This reflects exploitation.

The corrupt leadership of under developed countries is generally known as thieves in the developed countries.

whereas the same are populous leader of poor nation. Protection and corroboration of a thief is no where approved in Human Society.

After the II-world war, Developed Nations have established the barrier of visa system which restricts the entry of citizens belonging to developing countries.

The developed world, allow only labour class from these countries as per their need and requirements. For talent hunt they offer scholarships to talented ones. This process is generally known as "Brain Drain".

It is surprising that no new nation has been able to develop itself to enter in the list of Developed Nations as if the Intelligence. Talent and Wisdom has stopped its birthing in the under developed world.

People of developed world are far more pro-active in thinking of human behavior and affairs. To bring humanity on parity in respect of progress, it would be appropriate for the developed world to share their knowledge in science and technology freely with the people of under developed world as they are 88% of world population to avoid any unseen human catastrophe in the future. There is a suggestion also that all the children living on the planet must be provided free education up to highest standard without discrimination. No one knows which child is blessed by nature, who can contribute for the wellbeing of Humanity.

Since thousands of years humanity has crossed only one barrier i.e. abolition of colour discrimination. Nelson Mandela could never think addressing the UNO fifty years back whereas many heads of the States attended his funeral.

Many other barriers like Nation, Language, Gender Faith, Religion are yet to be removed, hopefully soon as there is fast growing of awareness regarding oneness of humanity because of interconnectivity through internet and electronic media. More responsibility lies on the people of developed world as they are advanced in knowledge. There is a need of removing disparities among people for more secure safe, peaceful and prosperous world.

Humanity is one
The earth is for all
To enjoy its fruits
Have a big heart to share
Knowledge and resources
With spirit of love and respect for all
On equity

Censorship and Freedom of Expression in Politics

History of censorship is as old as freedom of expression. They both run on parallel lines as Virtue and Evil. Virtue has force of Truthfulness, whereas Evil has its weapon like Censorship. With the passage of time, Censorship became more rigid and punishment more severe. There were many enactments which were made to apply Censorship like Index librorum, prohibitisms, the Dresden Codex, Decree of Charles IX of France, Nazi Germany, U.S.S.R Glavlit colonialism. Apartheid Censorship in South Africa.

The word Freedom carries with it happiness and joy. Censorship limits the Freedom, thus symbolises negativity. The word censorship has its roots in many other words such as Fear, Secret, Interest, greed, lust, cowardice, limited thinking, immaturity, hypocrisy.

When human beings started living in shape of a society, rules regulations and laws were formed to regulate the moral and political life of people. The system developed in various forms of institutions and departments, each having its own rules.

There had been wars among human beings over resources and lands. The top leadership felt the need of keeping secret, the strategic plans among few to avoid prior leakage to enemy. Thus promulgated a code, which later on took shape of censorship.

In case of default in a war, doubts arose that someone had conveyed the war plans to the enemy these people were punished to make an example or to create fear

for others in future.

Through this way all the governments in the past had been crushing the freedom of expression. Any writer journalist political worker raised his voice against any law, objectionable in his view, or personnel, spoke about new ideas to run the government in better way, they were severely punished.

History is full of violence, harassment, imprisonment, back lashes, and killings of political leaders, workers. The most glaring example in ancient time is of Socrates and in the recent past Nelson Mandela who was kept in prison for 27 long years. Eventually The establishment had to bow down to struggle for freedom. In fact the Brain cells of prevailing Leadership are blocked to accept the views of citizen which speaks for liberty and freedom .OR .Ruler greed for power prevent them to allow people of the human basic rights, who so ever criticize the policies of government, unjust Laws, The ruling Elite suppress that voice using Censorship Code .It is a shelter und which they take refuge. Through Censorship embargo The Authorities violate the principles of Humanity suppress the moral, ethical values and exploit Faith, Religion for their own ends.

This all is done to serve the interest of Elite of Nation which are always few in numbers. It has now taken the shape of Corporation business world wide. modern era Censorship is being used as a Tool which is being applied on print as well as electronic media is now institutionalized which mould the thinking of common people according to the policies of corporate Bosses. The innocent human beings become victims of conspiracy planned by the Elite. They are manipulated

believe that killing of human beings is a rightful act. Consequently 1 percent Elite of total population of the world is enjoying luxurious facilities of life and majority of the human beings lack basic needs, facing various kinds of deprivations over the Globe..

There is another kind of invisible Censorship applied on Non-Developed Nations through Financial restrictions which hamper the growth on equality as compared to developed one specially in the field of Education, may not become a Unified Voice for Freedom of Expression.

Censorship is one of the biggest barriers in progressive path of Humanity. It prevents the normal growth of new Talent and Wisdom causing great loss to humanity, this is done by the egoistic, immature Leadership of all the Nations.

Every child born on the planet is a new generation. The new child embarks on a gradual process of growth and develops its mind through what sees around, what it reads and what it experiences. Thus new thoughts, new ideas, innovations, germinates. 21st century is an era of information and interconnectivity, new ideas are flourishing speedily, Awareness of Oneness is rising, there is a growing demand for Transparency

In planning, policining and functioning of Government, institutions like the so called Secret Agencies are created. Humanity is getting mature as it has crossed an old age barrier of colour discrimination .Humanity will over come the other barriers of Gender inequality, Faith, Religion, Region, Nation and Linguistic etc..

Freedom of expression in Politics is more important

than in others fields. Civil society is run and controlled by the Political system through its various institutions, for the welfare, well being of its citizens in all respects of life. For the normal growth of Humanity on parity over the Globe, the principle of Freedom of expression is most important and needs is to be followed with the abolition of all kinds of Censorship. Thrusting of knowledge and awareness amongst new generation will ultimately break the dogmatic code of Censorship. Future of Humanity is in Democracy with Transparency in all affairs without bars and barriers.
