Rana Ehtisham Rabbani

Rana Ehtisham Rabbani is a man with every conceivable plus that can be imagined. A sportsman, a lawyer, an author and above all a peace activist with a passion for human well-being, globally. For his dedication and commitment to peace, he has earned the gratitude of thousands, not only in his home country, Pakistan but also in Bangladesh, Japan, USA, Canada, UK, India and South Africa. Whereas others spend a fortune to be recognized and known to public, he has no worries on that score. He is not beholden to anyone, is financially independent and untainted in anyway. He always finds the courage to speak his mind and in the process effectively spreads the message of peace and humanity. The focus is on humanity and safety of humankind. And for him the future lies in removing all barriers and boundaries of caste, creed, color, faith, religion, and geographical divide with discrimination, out and eliminated.

His thoughts are adequately summed up in one of his quotes:

O Humankind

Love thyself

Love others too

Love will return to you

Love begets peace

The best virtue

Preface

Humans are the best among all creation gone through a long way of evolutionary process.

Still undergoing the stage of awakening and awareness for making the living life, more comfortable, harmonized, peaceful and happier environment above barriers and boundaries on Earth. Destination of this journey of humanity is to attain a level of maturity, where everyone develop understanding of "oneness". All equal and respectable.

In 1995 being a lawyer I was in the Court premises when an incident influenced me to start writing for wellness of humans. "I saw prisoners debording a prisoner van with hand cuffs and chained in transferring process to sub jail in the court" wrote my first ever pamphlet "Dangerous animals are kept in cages – Dangerous humans are kept behind the bars in jails".

Human are the best creations, they should refrain from committing crimes, pamphlets was distributed among public at large. Response was very positive.

Later this became a movement of awareness and awakening relating to wellness, well being of humanity. 1.5 million pamphlets on various social

aspects of life were shared with the masses. Since then Pen never stopped rather it spread at global level through a website "humanityworld.com" for some years. It stopped because of renewal problem, now on Facebook "Rana Ehtisham Rabbani".

Movement will continue till the nature allows.

Some points of mission

Humans are all same and equal, respect all, love all
Solution of conflicts and disputes through dialogues and negotiations

Collective Wisdom is a sacred gift, honour it, respect it, trust it, act upon it. Wellness and well being of humanity lies in it.

No wars. No nukes

Control on arms, weapons, production trade and use.

To develop hate free, violence free, social life through education.

Justice for all on merit and parity.

Sharing of education and technology among all.

We love safety
All live with enmity
Food for all, health for all
All safe on earth
Humanity first, Humanity last

★★★

My home- earth

Wherever I went over the globe
Europe, Asia, America, Africa
I felt home everywhere
All living there is my family
Like brothers, sisters and children's
With variations in landscape,
In complexions and eating dishes
Feeling habits, actions, behavior, all the same
My family of humans
Spread all over the globe
One factor common in all
Bond of love

An oath-a pledge to serve people

Elected presidents prime minister and associates

Chosen and honoured dignitaries

Take solemn oath to serve people

Entrusted with authority & treasury

Mandatory obligations

To create peace & security

To ensure safety and care for all

Failure in objectives

Reflect deviation and defiance of oath

Good

A soft serene, soothing comforting and pleasing
appreciating encouraging weird good for one
always used in positive sense carry with from
childhood on the last throughout one life.

Good of all, good for all

A sacred mission on earth all religions, faith social system preach and work for good humans. How strange it is, those who claim working for good humans. How strange it is, those who claim working for good are disunited towards the common goal.

Either insincere or immature because of their disunity, negative forces overwhelm the human society all over, resultantly, majority face violence, hunger atrocities deprivations, disparities, sufferings and misery.

Must each of unifying themselves for the sacred it appears the followers of good are shuttering from psychological trauma of acute of HATE for their own vested interest thus they lose.

★★★

Sanctity of love for the good

HATE a most severe negative norm quite opposite to positive norm love for good. it is in believe that a follower of good falls victim of HATE for a their followers of one religion against another followers of one faith against another similarly followers of a social systems against other sometime in value in clash and fight.

It is all psychological disorder syndrome

Followers of one religion they contain themselves with in an orbit concerning to their rituals believing good for them.

There is possible likely that the cause of disunity among of good due to economic injustice inequities and like.

Unless humanity overcome such dilemma, it is impossible to achieve the goal of common good for all.

Humanity is undergoing evolutionary process of maturity keeping in view the rising awareness of oneness of human will start fallow the path of good for all. Good of all. Good for one another love for all. Love for a peace for all.

Peace museum on wheels

Humanity pass through many stages and phases in journey since its inception.

Currently in 21st century humanity is facing many major challenges and threats like global warning, cyber security issues, uncontrolled manufacturing and trade of weapons. Among these dangerous is the threat of nuclear ear, which would lead to extinction of humanity along with disastrous effect on environment and resource of earth.

I being a writer, author, lawyer, humanity and peace activist chose the avenue of abolition of nuclear weapons.

In 2012 I visited japan to participate in a peace conference organized by Iinternational Institute on Peace Education, where I read my paper "ban on nuclear weapons" during the summit a representative of Hiroshima peace memorial museum pointed out about posters reflecting horrific effects of Hiroshima, Nagasaki atom bomb blast in 1945. Through mutual correspondence. I received 30 pieces of poster showing thousands of humans along with infrastructure evaporated in few seconds.

I started my solo orchestrated museum namely "Peace Museum on wheels" unique in its kind as I carry these posters on a vehicle and place on the site of exhibition.

I organized 3 day exhibition at alhramra art council Lahore Pakistan 2-4 December 2013. Hundreds of people from various walks of life visited, and expressed, their comments. Later on more such exhibition were organized at Lahore high court and district bar association, universities, colleges and schools for general awakening and awareness about horrible of nuclear blast. This is hard to mention all the comments. But I will narrate summary of comments by citizens, judges, lawyers, teachers and students.

1. Excellent exhibition giving graphic details of the holocaust of nuclear bomb and destruction in the great city of japan.
2. Miseries of nuclear victims.
3. Mass destructions weapons to be destroyed.
4. We want nuclear free world. Elimination of all nukes.
5. Exhibition has great impact on our vision.
6. Reflect cruel attitude – un-regrettable memories great lesson for humanity.

7. Thanks you Japanese humanitarian agency, Hiroshima peace memorial museum.

Specifically to mention a comment-a lady layer entered the hall of exhibition and chanted 'we are atomic' after watching the poster she Charged her mind and wrote 'no way, no more Atom Bomb, never again.'

History oh humans kind is preserved mainly in books , museum" served as visual guide to educate, enhance knowledge for research work, thereby help in evolving future vision.

My conclusion in these exhibitions is that if people are shown realities of effects of wars, they learn from it. There we can work on making catalogues, videos of all the museum of the world this would enlighten the majority of human population and young generation. This project can be done under the supervision FIHRM with the collaboration of UNESCO.

In the end I pay my regards and thanks to the organizer of this conference for inviting me on such great conference.

Magic of Collective Wisdom – Tragedy of Polluted Wisdom

Wisdom is a sacred opinion expressed by human being, man or woman for the wellness, well being of people. It is a sacred gift from a human.

Collective wisdom is sacred gift of human beings living in an area, country, world.

Parliament is representative and symbol of pure wisdom – positivity.

Establishment of every nation has its own parameters to combat ugliness, evil intentions of enemy country, a country which has negative intentions against another country, disregarding the Collective Wisdom of its own citizens tantamount to contemptuous act and attitude on the part of establishment of that country.

Mixture of positivity and negativity is called polluted wisdom.

Collective Wisdom reflects Peace and happiness, which must be respected, honoured and trusted for the Peace all over the world.

Way to Purity of Human Rights

Introduction

In humanity world, human rights are the most sacred and moral norms which have been evolved through evolutionary process. These provide a foundation for living a peaceful life in harmonized and prosperous way on Earth. A basic right of human starts with the birth of a child i.e. right to exist = next is the right of feeding and care includes food, dress, shelter which of course his/her parents provide. Looking at history it is ascertained that the human rights process gone through many phases and stages. Remnants of old style living of humans still can be seen in some parts of Africa and even in Asia where tribal system is in operative form. This may continue for some time in future unless humans are fully aware of their rights through education and media.

We are passing through the era of 21st century, the so called modern life comparing with life before industrial and technology era, but we see no change in human behaviour. Our acts and deeds are on the same pattern overwhelmed by negative norms. Hate, arrogance, greed, dishonesty, injustice inequality, discrimination there is a perception, most probably because of the reason

that humanity's social system was based on the phenomenon of master, and slaves. In ancient time, somewhere at some place two groups of humans fought over the resources. Food, water, land for existence. The victorious group became the master and the defeated group was forced to play the role of subject, since then clash between the powerful and powerless is going on. One group tries for depriving the others from their rightful rights and 2nd group make struggle for reclaiming and retaining their rights.

Human social system travelled the journey from tribal system to monarchy. Then democracy capitalism, commission and democracy, from princely states to Nation states = communist block and Western block and now' developed nations and developing nations.

During this voyage different theories of social system were introduced by philosopher with explanation of human rights according to their prevailing circumstances with future vision eventually declaration of human rights was adopted by U.N General Assembly in Dec, 1948. Every Nation state has a constitution wherein it is envisaged that government is responsible to take care of its citizens in every aspect of life. Food, water health care, education, justice and treating all as equal. Mostly, Nation states do not fulfill their responsibility to deliver services to provide basic essential of life to ibcitizen, except few elites

who enjoy full perks of life. Hence Nation state can be held as a violators of human rights. How rich and powerful elite 131-ock exploit the humanity, _ u—

r.A. Ways and methods for depriving humans of their rights. 1) Dictatorship 2) Framing of laws 3) Administrative measures imposing restrictions freedom of expression and movements. 4) Uncontrolled manufacturing and trade of weapons. 5) Discouragement of merit 6) Corruption 7) Tax — Havens 8) Financial traps through loans 9) Foreign invasions 10) Financing sponsoring of terrorism

Sheltering Corrupt Money Above cited exinples are the tools of depriving humAirrights people. Central idea behind these astsand facts are to deprive.

Reforming Afghanistan Global situations of human rights is so grim that U.N high commissioner for humans rights, Michelle Bachelet has urgent this U.N. Security Council to hold all perpetrators of human rights violations accountable. U.N.H.C.R is high commissioner for refugees.

Filippo Grandi — There are news for enforced disappearances, abductions torture and extra judicial killings by security forces with impunity. Human rights defenders, journalist and others critical of the government. Continue to be targeted

with surveillance politically motivated charges and arbitration.

INDIA World report 2022 Human Rights Watch. Indian authorities intensified their crackdown on activist, journalists and other critics of the government using politically motivated prosecutions in 2021. Attacks against religious minorities were carried out with impunity under BJP and Hindu Nationalist Government. The ongoing harassment of journalist including those reporting from and in Kashmir including recent crackdown on Kashmiris independent press club being shut down, arbitrary detentions of journalists, alleged custodian killings and infringement by Fundamental Human Rights.

Current Situation Exploitation of human rights is an ongoing issue of humanity. Human rights are all sanctified and respectable. When a child is born on Earth, attains the right to exist along with all other rights. Nature has blessed every human with certain instincts among these two are most distinct.

(i) Desire to live (ii) Fear of Death. (./ Alleof disparities and discrimination are violations of human rights. The social system developed by human beings primarily promotes a master and slaves relationship. The powerful with all facilities of life and the powerless with meager facilities and rights. The whole structure of our social system such as civil administration system, justice system, rules, regulations and laws, all are made by the

powerful elite of the society. Therefore the interest of powerful and rich is always taken care off at all levels. All kind of disparities in

social system cause violations especially in developing nations. (Former colonies) because of old legacy of ruling system.

Some other features cause violations. Hegemonial war, occupation of foreign land, injustice and imbalance in the economic and financial system widening gap between rich and poor, sponsored military action and its aftermath rampant gender inequalities. It is beyond the imagination of people of developed nations that there exist educational schools with no facilities of sanitation, no shelter, no boundaries and much less in girls institutions. Humanity experiences all kinds of exploitation because of this phenomena.

Highest Violations of Human Rights Veto Power clause in UN Charter is gross violation of human rights at highest level of humanity. Veto has proved to be a tool of aggression. Currently we observe the Ukrainians are the victims of violence, torture, brutalities innocent killings through ruthless bombings and shellings on infant nurseries, hospitals, schools, residential buildings and other infrastructure, causing "Hell on Earth". Hard to watch unbearable scenes of deaths, suffering, misery, cries of children during bombings. Most ironic and unfortunate, none among humanity can stop, these monstrous barbaric acts in this world of 193 nations. "NO ONE IS THERE".

Shameful Violation of Human Rights Prevailing socioeconomic financial system compels a human to beg, a women to present herself for pleasure of others to earn livelihood for existence in this world of humans.

Suggestions and Proposals Humanity to raise unified voice. Free UNO from Veto captivity for sustainable peace on Earth I would submit that humanity needs to establish gallery of the most

condemnables of the world in which pictures with briefs of their crimes against humanity of those leaders who have been involved in ruthless killing of humans, massacres and genocide in the world. For future this will help to deter leaders of nations, that their names may not be mentioned among the most condemnables. I shall request and emphasize on youth of the world if they wish and desire to live in a peaceful environment on Earth, then they have to evolve a mechanism which can stop such mentally disordered acts and episodes. In my humble opinion there is only one path through which an environment of safety, security, peace and harmony can be established i.e. Unrestrained Sovereign Collective Wisdom, free of barriers and restrictions.

Let us say farewell to prevailing dogmatic social system and re-structure it on the basis of independent collective wisdom and transparency in state affairs from the lowest level to highest level. So tax payer's money may not be spent on negative project harming humans.

2. Eliminating egoistic syndrome on account of nationality, feelings superiority-greed for hegemony, hatred because of race, gender, colour, faith, religion, rich and poor.
3. Reducing gap of disparities in technology and living style.

4. Savings from non-productive manufacturing.

Fighter aircraft cost \$25 million ,Missiles 4 millions, Tanks 6 millions millitary vehicles 1 million, aircraft carrier 15 billions, its daily operational cost 1.5 million. All millitary machinery turn into scrap after few years and is sold at price 10\$ per kg.

By creating Hate free social system

By discouraging inequalities and discriminations on gender race faith, nationality basis

By improving financial economic greed free system

By sharing information, technology and resources on parity

By diminishing negative objectives against each others in any shape, kind and way.

By interchanging, exchanging studies, knowledge and cultural delegations.

By providing employment, jobs and opportunities all over the globe, visa restriction free travels.

By making this world “Real Humanity World”

Blessing upon on all fellow humans.

Border free future of the world.

EVIL - A MORAL VIRUS

Evil is a wide spread moral virus with multidimensional tentacles at all levels of human life, harming mental health causing society degradation, encouraging crimes of all kinds unimaginable financial as well as human loss mercilessly, regardless of gender, faith, religion and nation creating hell on earth through negative mind set holders among humanity. An uncontrolled phenomenon. It is ironic that all governments over the globe are effected of this virus someway or the other. It has also crept into U.N.O in shape of Veto.

DEMOCRACY AND FUTURE

Democracy is a noble form of government for running a cohesive social system. Positive Human opinion with the intention of living together in safe, secure and peaceful environment is a sanctifying gift which serve as the basic element of Human Social System.

Positive opinion in the collective form can be called as democracy which is collective wisdom of the people living in a defined area. Democracy has passed through many stages and phases of evolutionary process.

Primarily it started with tribal system (Chief with the consultation of fellow tribes men). In older time human lived in scatted form over different areas of land, mainly near water resources, banks of rivers, natural springs on hills and mountains. Slowly and gradually with the pressure of increase in population it spread on the other part of globe for more resources. Humans were bound to migrate from place to place as reflected by the

migration history of man kind. Journey of democracy gone through tribal system to kingship and in the last century it assume the shape of representative democracy overwhelmed the social systems of majority countries. Currently, democracy is undergoing polluted stage i.e. mixture of positive and negative objectives set by states for their vested interest. In present form democracy has been made as (Rich man's game).

Common man cannot dream of contesting an election to represent his fellow community people.

In another word, democracy is a tool in the hands of corporate sector with the collaboration of establishment of the state. This will be released by the youth of oncoming generation to achieve the target of real democracy with the expression of wisdom in free and fair social environment. Only for well being, welfare of all regardless of choices and priorities among rich, powerful or weak low income holders of society, as well as on global level without discrimination of Super Power or a small nations. Collective wisdom can never recommend, allow, suggest, proposed or approve negative tactics to achieve a positive target. Well being of humans can only be achieved by following positive means and ways.

This change is coming at a greater speed beyond the imagination of current global elite. Can be termed as revolution of consciousness of equality in rights and responsibilities on merit. There will be no more Veto Power at any level of human life constitutions of countries and U.N charter especially for the prevalence of Peace on top priority all over the planet.

Further more it is to mention that in this digital world, contesting election has become easier and less expensive with relation to election campaign for introduction of party policies and candidates.

In 21st century, humanity to take a big step forward. We hear and read about classified documents, some of them are declassified after certain period of times. It is evident that some states affairs are hidden from the eyes of Tax Payers, hiding is a negative norm which can never deliver positive result. Therefore for better future, supremacy of democracy and wellness humanity. Nations have to adopt principle of transparency in all state affairs. Tax payers have the right to know where tax money is being spent.

It is observed that there is egoistic hegemonial unending race going on between powerful countries. Public tax money approximately two to

three trillions is being spent on military expenditure, whereas according to a UN report "ending world hunger would cost \$267 billion per year".

Lets hope sanity prevails as earth belongs to all, its resources for all.

Only application of wisdom is required, in sharing resources, instead of fighting wars. War cannot be continued for all the time, after losing human talent power, innocent killings, heavy financial loss, huge structural damage, conflicting parties come to the Peace Table for negotiations and dialogues. Rehabilitation work cost billions and billions again through public tax money. Military armaments and weapons after few years time turn into scrap and is sold at price \$ 10 per kg. Hence forth only way is left to follow the path of dialogues and negotiations to create sustainable Peace in the world.

Where ever the humans reside they develop their culture for happy living style of life according to environmental habitat.

Happy living means PEACE. Peace through cultural diplomacy is the best form of bringing

Peace all over the globe. Exchange of delegations comprising groups belonging to various life style. Exchange of art and social sciences among nations will create harmonized world social system with no danger of negativity.

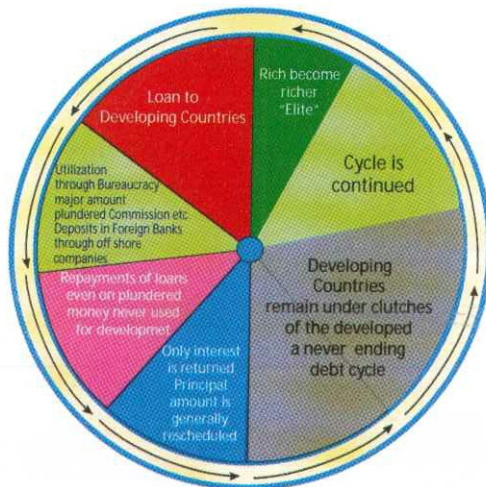

Good governance of democracy brings Peace.

Respect and trust Collective Wisdom for wellness and well being of humanity.
